

New Generation Gel Protection – Azure by Trulife.

The Azure range is the most advanced and innovative range of Gel products available in the OR today. Each product consists of two independent protective layers that work in combination allowing the moulded products to effectively conform to the individual user's shape in a more contoured and less structured manner, resulting in effective protection against nerve damage and skin breakdown. The new approach by Trulife was to create a product that replicates and acts as an additional layer of protective tissue and skin. Azure has set a whole new standard of protection in the OR.
